

LISTING OF CLAIMS:

Claim 1 (canceled)

2. (Currently Amended) The microscope focusing apparatus according to ~~claim 1~~ claim 15, wherein said first support supports said first light illuminator with a round dovetail.

3. (Currently Amended) The microscope focusing apparatus according to claim 2, further comprising a revolver which holds a plurality of ~~said~~ objective lenses in a changeable manner,

wherein said first holder ~~has the~~ comprises a dovetail to which said revolver is ~~to be attached~~ attachable, said dovetail ~~allocated~~ being provided on said observation optical axis.

4. (Currently Amended) The microscope focusing apparatus according to ~~claim 1~~ claim 15, wherein said second support supports said ~~focusing main body~~ second light illuminator with four bolts.

Claim 5 (withdrawn)

6. (Currently Amended) The microscope focusing apparatus according to ~~claim 1~~ claim 15, wherein said holder and said focusing movable portion ~~have~~ comprise respective attaching

surfaces, and respective wall surfaces perpendicular to said
5 respective attaching surfaces ~~are allowed to abut on each other,~~
and wherein said respective wall surfaces are abutted against
said respective attaching surfaces so that for positioning and
assembling the holder and the focusing movable portion ~~are~~
~~positioned and assembled.~~

Claims 7-9 (withdrawn)

m
10. (Currently Amended) The microscope focusing apparatus
according to ~~claim 1~~ claim 15, wherein said focusing main body is
separated into a guide portion and a focusing handle main body,
and said guide portion ~~can be selected~~ is selectively detachable
5 from and attachable to said focusing handle main body.

11. (Currently Amended) The microscope focusing apparatus
according to claim 10, wherein said guide portion ~~has~~ comprises
said focusing movable portion and a frame of said focusing
movable portion, and wherein said focusing handle main body ~~has~~
5 comprises a focusing handle and a frame of said focusing handle.

12. (Original) The microscope focusing apparatus according
to claim 10, wherein a middle gear portion is attachably/

AI end
detachably disposed between said guide portion and said focusing handle main body.

Claim 13 (canceled)

14. (Currently Amended) A microscope comprising the microscope focusing apparatus according to ~~claim 1~~ claim 15.

15. (New) A microscope apparatus comprising:

A2
a first holder which holds a first light ⁴⁰illuminator, an objective lens and an observation tube, said first holder including a first support that is disposed on an observation optical axis and that supports the first light illuminator;
5 a second holder which holds a second light illuminator, an objective lens and an observation tube, said second holder including a second support that is disposed outside the observation optical axis and that supports the second light
10 illuminator; and

a focusing main body including a focusing movable portion that is linearly and vertically movable, and an attaching portion that is formed in said focusing movable portion and to which the first holder or the second holder is selectively attached.

*6.36
revolver*

16. (New) A microscope focusing apparatus comprising:
a plurality of holders, each of which holds a light
illuminator, an objective lens and an observation tube, each of
said plurality of holders including a support which supports said
light illuminator; and

a focusing main body including a focusing movable portion
that is linearly and vertically movable, and an attaching portion
that is formed in said focusing movable portion and to which one
of said plurality of holders is selectively attached.
